Thank you, Wisconsin

"Teleconnect magazine recently surveyed the top 50 business telephone communications firms in the country and determined Mid-Plains Communications Systems to be the growth leader during the past three years—an average of 390% per year. Thank you for doing business with us!

"If we can help you in 1984, call one of our four offices for free advice or our toll free number, 1–800–362–2017."

SOME THINGS WILL BE AROUND A LONG TIME—LIKE *Brick*

Since 1885, BELDEN has been in the business of manufacturing brick. It has been a labor of love, steeped in a tradition of quality. Today, BELDEN provides the architect with *more* colors, *more* sizes, and *more* textures. A selection of over 200 variations for virtually unlimited choice. That's why so many creative architects call on BELDEN.

And like the Acropolis, brick from BELDEN will be around a long time!

Your BELDEN Dealer will show you the facts in the form of samples, or write us for a free 4 color brochure at Box 910, Canton, Ohio 44701.

Membership Information

REGULAR MEMBERS are architects who are legal residents of and have been licensed or registered by any state, the District of Columbia or any U.S. Territory.

ASSOCIATE MEMBERS are persons who are legal residents of Wisconsin and are employed in a professional or technical capacity under the supervision of a licensed architect directly related to the practice of architecture, or are employed in circumstances recognized by licensing boards as constituting credits towards architectural licensing.

PROFESSIONAL AFFILIATES (State members only) are non-architects, registered to practice their professions where such requirements exist with established professional reputations. Professional Affiliates may include engineers, planners, landscape architects, sculptors, muralist and other artists, professionals in government, education, industry, research, and journalism, and other professionals whose work is related to the practice of architecture.

STUDENT AFFILIATE (State members only) are undergraduate or post-graduate students of architectural schools or secondary school students within the territory of the WSA.

DUES STRUCTURE

3rd year or more AIA member pays total amount

SUPPLEMENTAL DUES NOTES

The AIA Regular Member is also responsible to the Institute for supplemental dues beginning on January 1 of the year following admission based upon the number of registered architects in the firm (both employees and employers as of January 2) at the rate of $170.00 each. The firm will be given a credit of $100.00 against its supplemental dues obligation for each such registered architect who is an AIA member.

Invoices for national and state, dues will be mailed in December.

Members who have not paid WSA dues by July 31 shall be in default and shall be so notified. Members still in default as of September 31 shall be terminated.

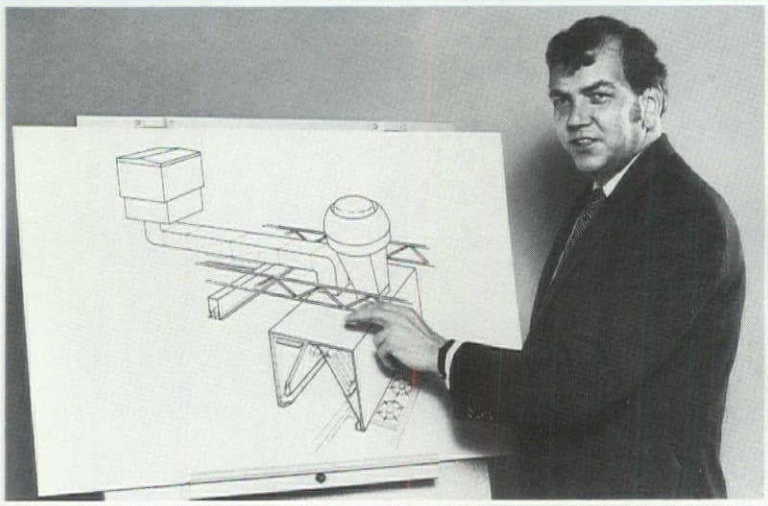
Confused About All the Claims and Counterclaims from Kitchen Exhaust Hood Manufacturers?

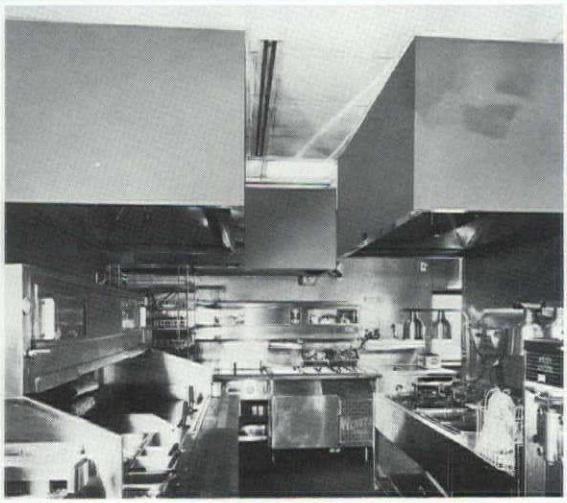
Let Econovent Clear the Air

Econovent is the pioneer and major producer of the scientifically engineered, energy-saving compensating kitchen exhaust system . . . and **we have the patents and approvals to prove it.** Our energy saving system improves kitchen ventilation and increases profits for the user.

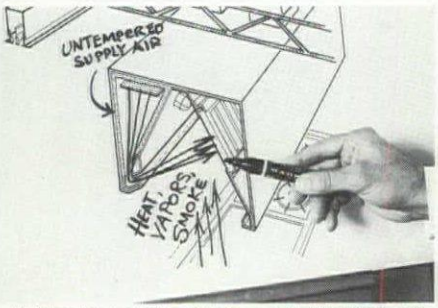
Since this system was developed by Econovent, several imitators have seen a good thing and jumped on the bandwagon. Now they all sound alike — even the advertising and literature have a familiar ring. No wonder the average customer is confused. So here are the facts from Econovent's Vice-President, Sales and Engineering, E. Richard Larsen.



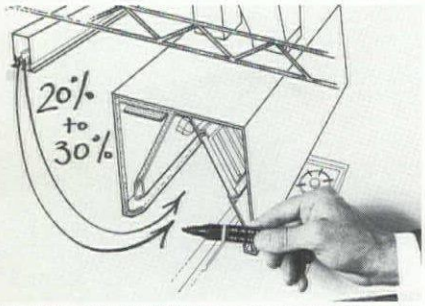
Dick Larsen points out that the Econovent system eliminates the need for separate make-up air units and lowers the tonnage required for the total HVAC load, while providing savings of up to 80% of energy required to heat or cool the kitchen. "We make untempered air work for you."



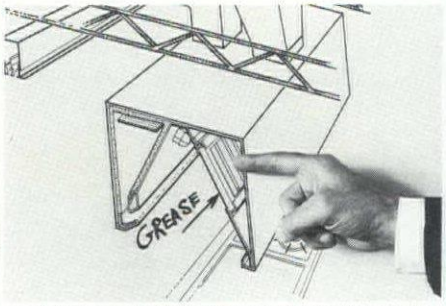
Unlike other hoods, with Econovent's unique system there are no drafts on prepared food or personnel. What's more, Econovent's system works year round in any climate — even at −70°F in Alaska or at 98°F in New Orleans. The hood's high quality construction and attractive design add to any kitchen decor.



Utilizing the venturi principle, patented* primary air slot (up to 80% at 1200-1600 FPM) along front edge of hood introduces a "jet stream" of supply air without turbulence and creates induction. This improves the ability of the hood to capture and exhaust heat, vapors, smoke and odors.



Secondary air (20%-30%) from exclusive Econovent ceiling slot diffuser is directed below the hood and induced into hood by the low-pressure venturi effect. All untempered air is confined within hood.



Econovent was also first to recognize that the high velocity untempered supply air contributes to more positive congealing of grease on the filters. This minimizes grease buildup in ducts and on roof tops for easier cleaning and less maintenance. Reduces fire hazard, too.

ADDITIONAL FEATURES:

- **Available in 3 styles — wall, island, backshelf. Your choice of stainless steel or custom colors.**
- **National network of manufacturers reps to assist with sizing, application, local code compliance and installation. Licensees in most free-world countries.**
- **Will custom build to your requirements.**
- **Retro-fit, add-on system available.**

*Patent Numbers 3,978,777; 4,047,519; 4,153,044

Makeshift vs. made right.

Now there's no reason to make do with out-of-date.

Tradition has just been made obsolete. ▪ Traditionally, a fire-protection valve meant a standard O.S.&Y. gate valve. Complete with a hard-to-install supervisory switch and space-devouring size. ▪ But now there's the specifically designed Slow-Close Butterfly valve from Milwaukee Valve. ▪ The Slow-Close Butterfly was made for, not adapted to, fire-protection use. It takes up half the space, and can be ordered with a built-in supervisory switch to eliminate awkward field assembly and call-back switch adjustment. ▪ The patented design of Milwaukee Valve's Slow-Close Butterfly valve means it's ready for fire-protection use. Ready with a prewired switch. Ready with UL and FM approval. ▪ On your next fire-sprinkler job, make sure you have the valves made for today. Made for saving time, money and space. Specify the BB-SC Slow-Close from Milwaukee Valve.

Designing, Building and Rebuilding for Tomorrow

Wisconsin Society of Architects Construction Industry Handbook

Fourth Edition, February 1984

The WSA Construction Industry Handbook is published as the February issue of the Wisconsin Architect as a reference handbook for all readers on matters pertaining to the Wisconsin Society of Architects.

The circulation of the Handbook is to all members of the Wisconsin Society of Architects of the American Institute of Architects (WSA). Additionally, copies of the Handbook have been sent to members of the Associated General Contractors, consulting engineers, interior designers, landscape architects, and many other individuals involved in the design and construction industries.

Your comments and suggestions are appreciated with reference to other individuals or organizations that should receive copies of this Handbook next year, as well as revisions or changes in content that you feel are appropriate.

One last word. Please continue to refer to the advertising portion of the Handbook when looking for products or services. Without this support the Wisconsin Architect and this Handbook would not be possible.

NOTICE: The Wisconsin Architect and/or the WSA are not responsible for materials that have been rendered obsolete or revised since this Handbook was printed.

All paints are not created equal!

Buying latex house paints can be a mystery. It's hard to tell what you're really getting for the price you pay. Look at the comparisons below; they may be helpful to you in determining the relative value of some leading brands, comparably priced.

Take a look at some of the factors that make up a quality paint product.

Water Content Per Gallon
Water content per gallon is important because water evaporates from the surface as the paint dries, leaving the pigments and binders (solids) as the remaining paint film. The more water content, the less solids remain to protect the surface.

Total Solids Content
Total solids content is the combination of pigments and binders which creates the dry paint film; the film which remains on the surface to protect your home over the years.

Titanium Dioxide
Titanium Dioxide is important because it is a very expensive pigment which provides the basic "hiding power" in white and light colors, and creates the brilliant, clean white appearance expected of "pure white" house paints.

Light Reflective Values:

Mautz House Saver	91.8
Benjamin Moore Moorgard	83.1
Glidden Spred	79.9
Pittsburgh Sun-Proof	78.9
Sears Weatherbeater	77.4
Sherwin-Williams A-100	76.7

Now look at how Mautz House Saver stacks up against five* competitive paints. This is from actual label information of products purchased June 1983 in Madison, Wisconsin.

Compared to Mautz House Saver:

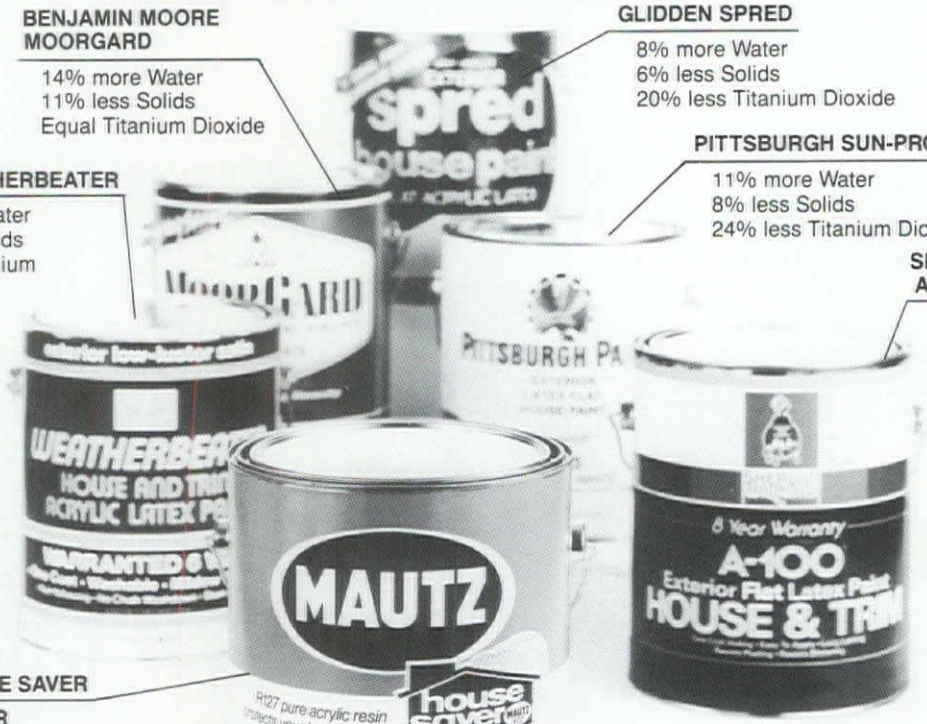
BENJAMIN MOORE MOORGARD
14% more Water
11% less Solids
Equal Titanium Dioxide

GLIDDEN SPRED
8% more Water
6% less Solids
20% less Titanium Dioxide

PITTSBURGH SUN-PROOF
11% more Water
8% less Solids
24% less Titanium Dioxide

SEARS WEATHERBEATER
42% more Water
29% less Solids
7% less Titanium Dioxide

SHERWIN-WILLIAMS A-100
46% more Water
46% less Solids
34% less Titanium Dioxide



MAUTZ HOUSE SAVER
LESS WATER
MORE SOLIDS
MORE TITANIUM DIOXIDE

*	Sellers Retail Price
Mautz #21-House Saver White	$18.95/gal
Sears #36015 Weatherbeater White	17.99
Sherwin-Williams #100-4050 A Perma White	18.99
Benjamin Moore #10301 Moorgard Brilliant White	20.30
Glidden #3600 Spred White	19.99
Pittsburgh #72-45 Sun-Proof One Coat White	18.87

Mautz Paint is available from over 200 dealers, wholesalers and factory branches throughout the upper midwest.

President's Message

Dear Colleague:

"1984" . . . the magic year is with us. If you take George Orwell at his word, this is the year we are to look at with some despair and gloom. Such is not the case for the Wisconsin Society of Architects.

1984 will be a year of expanded programs, activities and vitality for the Wisconsin Society of Architects. This year we will acquire a permanent home — The Stoner House in Madison. This year we will see a new format for our Convention which will provide even greater vitality and activity. This year will see a continuation of our very successful Fall Workshop. This year will see continued representation of your interests before the Wisconsin Legislature and various Administration Agencies. This year will see continued efforts at public education and awareness on matters pertaining to architecture, including publication of articles in selected magazines on selecting and working with architects and an extended outreach program to all high schools in Wisconsin attempting to educate the next generation of consumers on "What Is An Architect?". This year will see increased membership services in a wide variety of areas including insurance, the WSA Library, video tapes on matters of topical interest for members, documents distribution, etc.

In seeking to accomplish these goals, our dues for 1984 will remain unchanged, as they have for the past 10 years. We are extremely proud of our ability to continuously expand the scope and quality of our services and activities . . . without putting our hand into your pockets.

The Wisconsin Society of Architects is one of the strongest components of the American Institute of Architects and we have generated substantial respect and standing amongst other professional societies in the State. All of this growth and achievement is directly attributable to you . . . our membership. The heart and soul of the WSA remains the over 700 members who give of their time, effort and enthusiasm. You are encouraged to be an active member. **Your** staff and officers remain eager to hear from you and reflect your concerns, interests and directions.

The world of architecture has dramatically changed in the last decade and remains in a state where further changes are most apparent. While the WSA has no crystal ball which will provide a magical insight into the direction of these changes, your organization is very much committed to participating in those changes and articulating the interests and concerns of Wisconsin's architectural community.

On behalf of the entire Board of Directors of the WSA, we look forward to working with you in 1984.

Sincerely,

Frederick E. Zimmermann

Masonry Institute of Wisconsin

NORBERT J. HYNEK
Executive Vice Preside

8989 N. DEERWOOD DRIVE • MILWAUKEE, WISCONSIN 53223 • (414) 355-7800

TO: MEMBERS OF WISCONSIN SOCIETY OF ARCHITECTS
AMERICAN INSTITUTE OF ARCHITECTS

We are pleased to announce that St. Mary's Home Tower Addition in Manitowoc has been selected for "Excellence In Masonry". Edward A. Solner describes the project as follows:

"The St. Mary's Home Addition required a "fast track" approach with a time frame of fifty-two weeks. Eighty-four new residents were to be transferred from another local nursing home at the end of that time. The project was licensed and ready for occupancy in fifty weeks.

The application of masonry for this project consisted of internal block bearing walls in conjunction with a reinforced concrete frame system and the exterior brick veneer application.

Special 45° corner brick units were manufactured to minimize masonry sawing and time and to unify the external corners. Minimal exterior maintenance was considered with the use of brick.

The end result is a compliment to the existing nursing home and the community.

The tradesmen, whose sweat and effort usually go unnoticed, deserve the congratulations for a project well done."

Congratulations to Edward A. Solner for "Excellence In Masonry".

Very truly yours,

MASONRY INSTITUTE
OF WISCONSIN, INC.

VANQUISH THE DARK AGES

Let us vanquish those old dragons that said, "Faucets are supposed to turn on water...not people."

Hail IV Georges Brass.™

It's Kohler's richly turned brass faucet designed with the ornamentation of England's IV Georges era, the elegance of our Georgian period and the warmth of brass and wrought iron.

IV Georges has inspired accessories for the bath and powder room: Soap dishes, towel rings and bar, tumbler/toothbrush holder, robe hooks, mirrors, whirlpool jets, and other finery.

IV GEORGES BRASS

Come Lord. Come Lady. Vanquish the Dark Ages. Draw on the mettle that is IV Georges Brass.

See IV Georges Brass faucets and accessories, as well as the entire spectrum of fine Kohler products for the kitchen, bath, and powder room, at a Kohler showroom near you. Check the Yellow Pages for the nearest location.

THE BOLD LOOK OF **KOHLER**

Floors and walls are not the whole story.

Spancrete. You know our name because of our long-standing reputation for excellence in pre-cast, pre-stressed concrete floor slabs and wall panels.

At Spancrete, however, we also make a wide range of architectural pre-cast walls, beams, columns, single and double tees up to 115 feet in length, stairways and much more.

We are constantly adding innovative new products and custom forms to our line. For example, we now manufacture insulated wall panels that sandwich a layer of insulation between an interior hollow core panel and an exterior concrete slab.

Just like the well-known Spancrete floor and wall panels, all our products and systems are designed to close tolerances and well-defined specifications. Dependable technical data (live loads, fire rating, insulation factors, etc.) give you the flexibility to build with optimum architectural and structural design. The Spancrete story. Make sure you hear it in full detail before you start your next building.

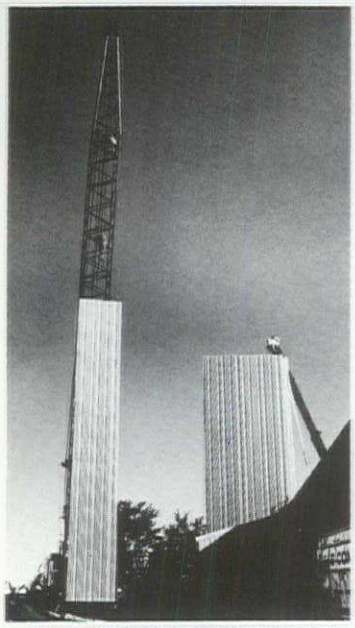
Wherever you build in Wisconsin, FABCON'S there.



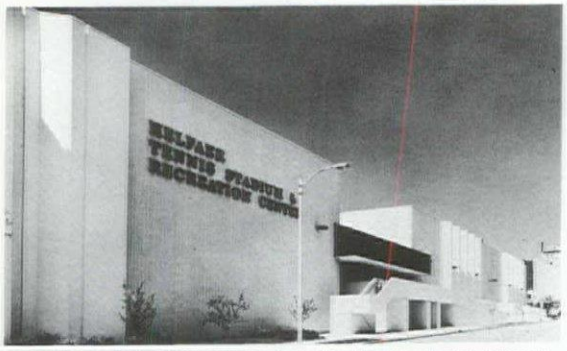
HERITAGE WAFER CO., RIPON — This addition to an existing cookie plant was notable for its 54 foot high wall panels. Fabcon panels are cast on rolling beds up to 700' long then cut to precise shapes and lengths.

MILLER BREWING COMPANY, MILWAUKEE — Warehousing facilities built with Fabcon insulated sandwich panels provide long-term savings through reduced maintenance requirements.

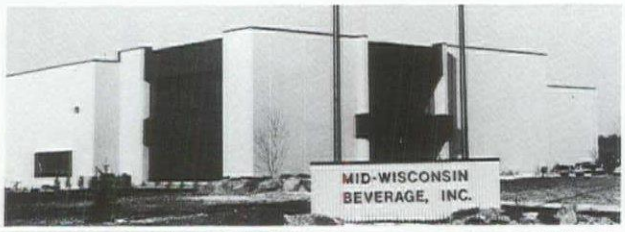
DISTRIBUTION CENTER, DODGEVILLE — The integral insulation in the 36' long ground-to-roof Fabcon wall panels provides outstanding energy efficiency for lower operating costs at this 150,000 sq. ft. warehouse/distribution center.

RAPIDS MALL, WISCONSIN RAPIDS — Shopping centers across the Upper Midwest built with Fabcon precast panels offer tenants attractive advantages.

PEPSI-COLA BOTTLING, EAU CLAIRE — Continued selection of Fabcon panels is a testament to owner satisfaction with price, performance and appearance.



HELFAER RECREATION CENTER, MARQUETTE UNIVERSITY, MILWAUKEE — A multi-use recreational facility with raked finish wall panels for visual interest and an open span interior for recreational use.



MID-WISCONSIN BEVERAGE, WAUSAU — Fabcon panels have been specified at four Pepsi Cola manufacturing facilities in recent years. The structural stability provided by Fabcon is a strong selling point.

STEWART DAIRY, MARSHFIELD — Food production facilities take advantage of Fabcon's smooth interior wall surfaces. Nothing more than simple painting is required to provide an easy-to-clean and hygenic finish.

Today you'll find buildings using Fabcon prestrssed precast concrete wall panels and floor planks throughout the state. Whether it's an office, manufacturing plant, warehouse, apartment or public building, talk to Fabcon before you build. Find out more about Fabcon building techniques and how they can mean a better building at a lower cost. Request our FREE booklet by contacting our local office.

You Know It's the Most Versatile, Durable, Beautiful and Preferred Wood Species — But Did You Know that 3 Million Board Feet of Western Red Cedar is Ready For Wisconsin Delivery?

It's hardly necessary to preach the properties of Western Red Cedar to knowledgable architects. Applications of cedar — the beauty, the durability, the ease of maintenance — speak for themselves. But what about availability?

If you've hesitated to specify cedar on a project because you weren't certain of its availability in your area, it's time you got to know the Cedar Experts at Mid-America Cedar (MAC).

MAC is the Midwest's largest cedar distribution center with a 3-million-board-foot inventory of cedar products — everything from bevel siding and paneling to dimension boards and timbers to shakes and shingles. MAC is the exclusive stocking distributor of HAIDA™ brand sidings and Shakertown siding and roofing systems.

But a large inventory of quality products isn't MAC's only claim to fame. **MAC has weekly truck delivery service into Wisconsin — every Monday and Tuesday.**

Want the full MAC story? Or perhaps you have some specific questions about cedar products or applications. Give the MAC Cedar Experts a call. We'll find an answer to your question and send you a "Cedar Solutions" notebook too.

WSA Firm Directory

Wisconsin architects in recent years have won many important awards and commissions across the nation. They have also served thousands of clients, large and small, throughout Wisconsin and the Upper Midwest with skill and dedication. If you need the services of a highly qualified architectural firm, you will find a suitable one in this Directory. Or if you aren't sure you need an architect, any of the firms listed herein will welcome the opportunity to meet with you to provide professional advice and recommendations.

metpar TOILET PARTITIONS . . . Preferred Where Quality Is Appreciated

Metpar has been building a superior product line for over two decades. Experience proves it has the excellence of design and the built-in quality that afford sturdy installations and enduring service wherever emplaced—in prestigious buildings, commercial structures, institutions, industrial plants.

Their performance record is backed by Metpar's guarantee—against defective workmanship and materials, under normal wear and conditions.

Little wonder then that you'll find Metpar products in structures that represent the finest examples of their type the country over. For to the architect, the Metpar line offers a standard of construction that others attempt to equal, and not always successfully. And to the contractor, Metpar products remain competitive for all of their features and advantages.

Stronger Built

As the moving element, doors are subject to the most abuse. Thus, Metpar makes them stronger by using one piece oval molding construction through the front of the door. Other manufacturers use two pieces of molding meeting at the latch or weakest point of the door.

Tough Baked Enamels

Primers and finish coats used on Metpar products are formulated from the finest of modern synthetic materials. Enamels have non-staining properties to resist the cleaners normally used; and to eliminate unsightly stains and deterioration.

Electrostatic hot spray application of Metpar coatings assures better all-around protection. Heated in specially designed equipment, paints are highly atomized. Attracted to the panels, paint enters and adheres even in areas ordinarily inaccessible to cold spray enamels.

Result: A smoother, full bodied, abrasion and corrosion resisting finish of automotive quality and beauty.

Stainless Steel Compartment

Stainless steel Metpar compartments are of non-magnetic 302 (18-8) type with No. 4 finish. This grade provides all the corrosion resistance required for the service environment.

Plastic Laminate Compartments

As with metal partitions, Metpar emphasizes quality in both construction and materials for this line of products expertly fabricated in our own enlarged production facilities in a broad choice of color combinations, woodgrains and patterns.

Solid Phenolic

Metpar offers solid phenolic core material. This material is water resistant and will not delaminate under severe moisture and steam conditions. Available in a wide selection of wood grains and solid colors.

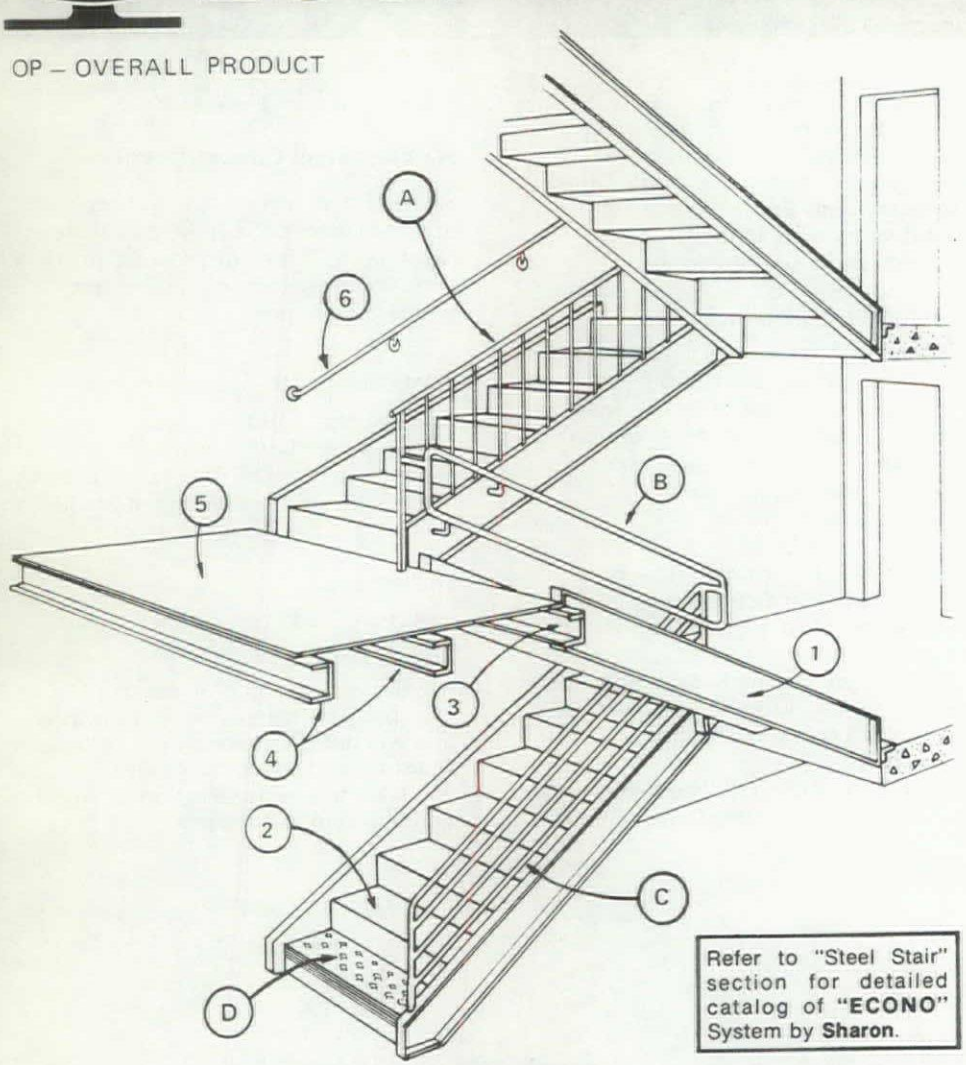
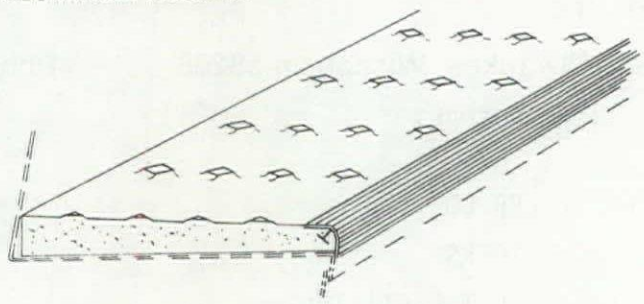
ECONO "DROP-IN" STEEL STAIRS

OP – OVERALL PRODUCT



Refer to "Steel Stair" section for detailed catalog of **"ECONO"** System by **Sharon**.

D. PRECAST TREAD WITH ALUMINUM NOSING



A complete list of projects installed by Sharon Ornamental Iron in your local area will be mailed to you upon request.

STANDARD CONSTRUCTION

1. 11 ga. Bent Plate Stringers
2. 14 ga. Pan Treads & Risers (for concrete fill by others) or 12 ga. Bent Smooth Plate Treads & Risers (for rubber treads by others)
3. C-6" x 8.2 Header Channels (set by others)
4. 11 ga. Bent Plate Landing Channels (set by others)
5. 14 ga. Landing Plate
6. 1⅝" Round Steel Pipe Wall Railing

Finish: One shop coat red oxide primer.

SPECIAL RAIL CONSTRUCTION, TO MEET CODES

A Picket Type Rails
B 2 - Line Parallelogram Rails
C 4 - Line Parallelogram Rails

TREAD TYPES

A Concrete Fill Pans
B Smooth Plate
C Checkered Plate
D Precast Concrete **(New by SOI)**

Features

Complete Off-Site Fabrication
Assurance of "On-Time" Delivery
Utilization of "On-Site" labor to set Framing Members
Accelerated Installation
Immediate Floor-to-Floor Access
Complies with all Federal, State and Local Codes (HUD, FHA, BOCA, OSHA)

Budget Priced

For the cost conscious builder. Econo Steel Stairs will save you time and money. Quoted F.O.B. Medina, Ohio, with freight allowed to jobsite or delivered and erected by our specially trained field personnel.

Custom Built

For every individual project. Econo Steel Stairs are fabricated to fit any stair well opening and floor-to-floor height. Flexibility in tread, riser, stringer and railing design makes for latitude in esthetic and functional consideration.

Multi–Story Applications

Are ideal because Econo Steel Stairs are designed to give maximum adjustment in the field. This means that we do not have to wait for the final floor to be set before we take field measurements and start fabrications. And we save you money by fabricating the complete stairway at one time.

Call (414) 344-9157
Ask for Mike Kilp

1331 N. 29th Street
Milwaukee, WI 53208

You probably chuckled a little, then maybe you'll even laugh when you read that we have available

"TRANSPLANTS" FOR LOCKERS TOO FAR GONE

Yes, we are now manufacturing door and frame assemblies and whole lockers and we have chosen a medical name for the process of installing them. You might laugh till you notice a 16 ga. back panel. Then you'll notice our spec calls for a full 1/2 wide continuous strike, 2 1/2" - 14 ga. hinge, extra thick number plates coated so numbers can't be scratched off. You'll remember our single point locking system from major surgery which so many have used to reduce their maintenance by 97% and the norel plastic that resists burning and beating and the 10 ga. hasp. It means no moving parts and no wear.

By now you're not laughing, but you might smile and say "OK, how much?" Yes, we are more expensive - quality does cost a little more, but let me tell you a little story. The other day I was called to a school that has two types of lockers. One type was built like ours except that they didn't have our single point locking system. They were 55 years old and were in great shape except for the locking system which has worn from 55 years of movement. The other lockers were only about eight years old and they looked worse than the 55 year old ones. The administrator wants major surgery on the old ones and a transplant on the new ones. Fifty-five years from now our work on both these will still be in tact and our competitors will have sold two or three complete new jobs to some of the same schools they sold to this year. By eliminating the operating hardware we eliminated the one flaw that the 55 year old lockers had. Who knows how long they will last! If you stopped smiling here and started thinking beyond the next five years, maybe you want to talk to us. Send back the enclosed card and see if what I'm saying is true.

Sincerely,

Mike

Mike Kilp

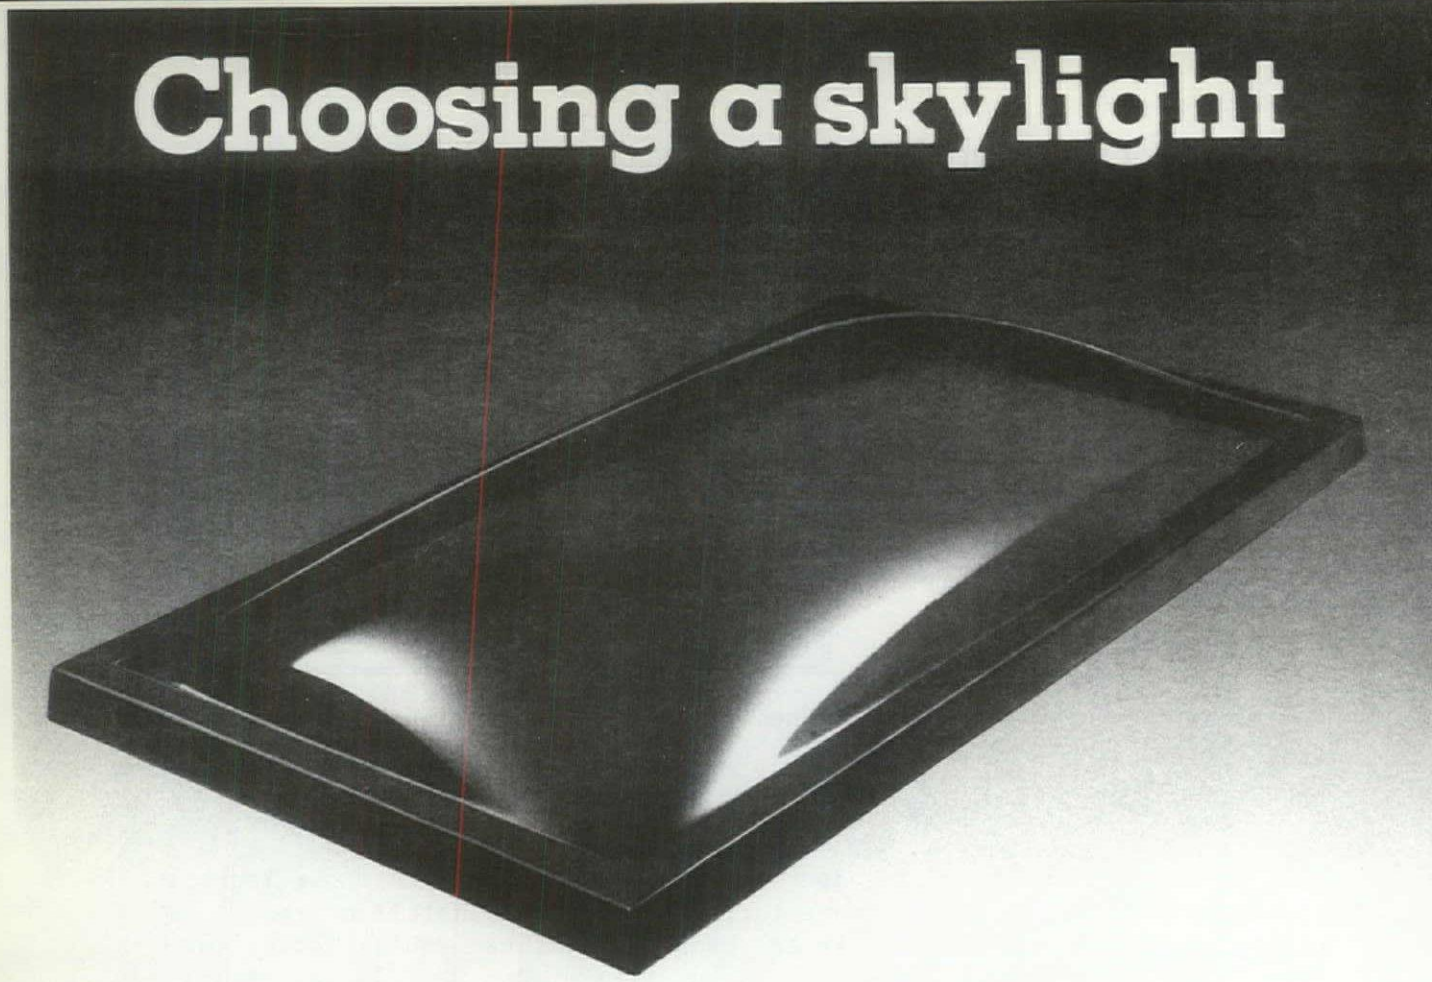
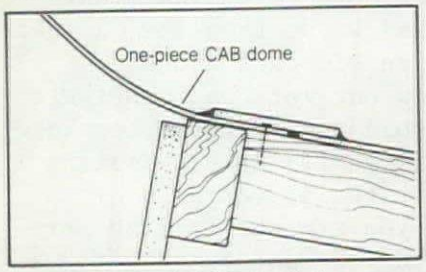
Choosing a skylight

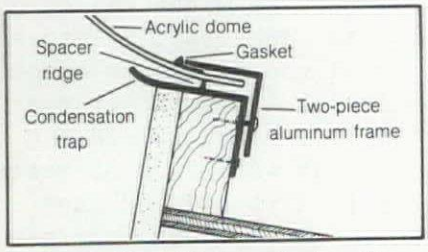


Three traditional types of construction.

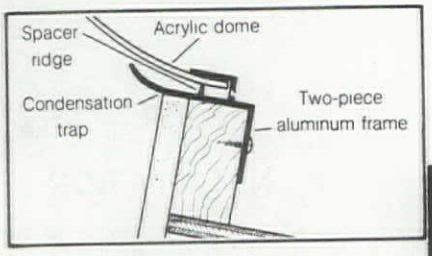
Until fairly recently, most residential skylights were manufactured according to one of three basic designs. The first was extremely simple, consisting of a



single piece of CAB (cellulose acetate buterate) formed in the shape of a dome. Second was an acrylic dome mounted in an aluminum frame with gaskets to prevent

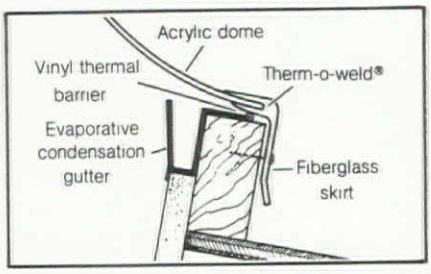


leaking. The third, called a flow-through design, again used an acrylic dome but drained water through holes around the edge of its aluminum frame while relying on an integral spacer ridge to keep out wind and water.



Therm-o-weld® construction

Then a new design emerged based on Bristol Fiberlite's exclusive Therm-o-weld® process. It fused an acrylic dome and its fiberglass frame into one piece to eliminate the source of leaks.



It's tough out there.

At first glance all four types of construction look satisfactory. However, wind and weather tell a different story.

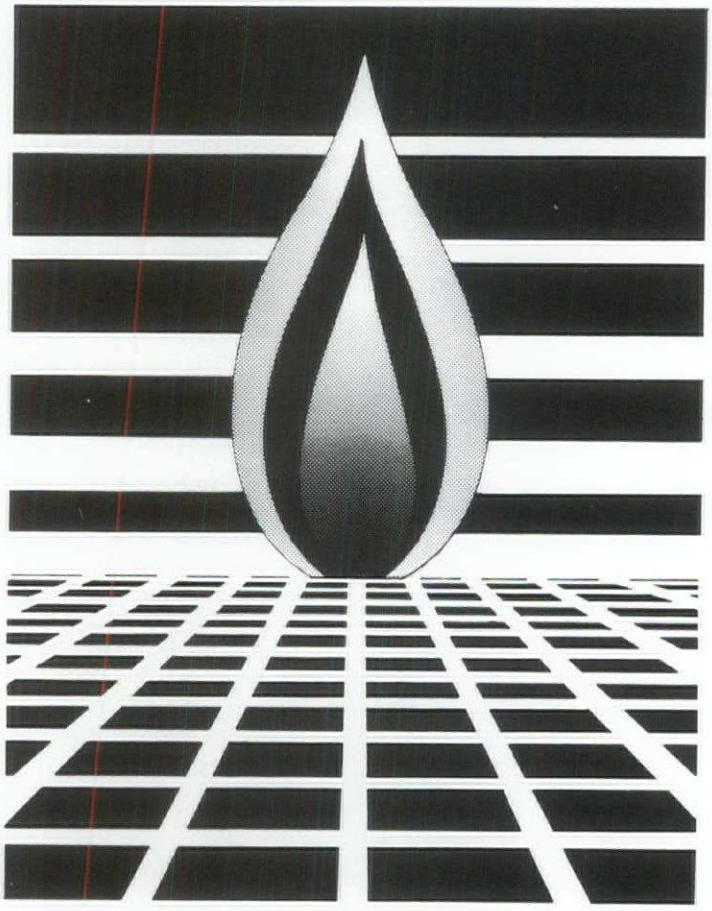
Design the future with natural gas.



Natural gas. Efficient, dependable natural gas. There's a good supply of proved reserves for the present and vast untapped reserves for the future.

If you have questions or need information, contact us. Wisconsin Natural Gas, 233 Lake Avenue, Racine, Wisconsin 53403, 414 637-7681. We have the complete natural gas story including availability, pricing and conservation information so you can design the future...with natural gas.

WISCONSIN NATURAL GAS

Like other companies, Wisconsin Natural Gas includes customer information expenses in the cost of providing service.

WSA-AIA State Organization

The Wisconsin Society of Architects of the American Institute of Architects (WSA) with over 700 members is the state component of the national organization representing architects and related professionals in the state of Wisconsin. Members from private firms, corporations, industry, government, and education join together to maintain and represent excellence in architecture, the profession and to the public. This is accomplished through the many programs the WSA offers its members.

WSA membership offers many different opportunities for education and career development. The WSA is striving to help in advancing each individual's architectural skills, professional understanding and career opportunities.

With offices located in Madison, WSA is directed by Board of Directors which sets priorities of the organization and initiates new programs. The Board of Directors consists of 19 representatives from the state's four local chapters. The president and vice-president of each chapter automatically are members of the Board. Five Directors-At-Large are elected by the state membership from the local chapters through an at-large election. Two students also serve on the Board. The four primary officers compose an Executive Committee which is selected by the Board of Directors itself — from the membership roster of the WSA.

There are in excess of 45 standing commissions, committees, and short-term tasks force which recommend and execute policies, plans and produce programs. Membership on these state groups is drawn from the WSA membership.

When professional architectural expertise is needed by national, state, or local government bodies, members are nominated from the WSA to serve on such committees.

A full time staff headed by an Executive Director, located in Madison, handles day to day operations and is available to all Wisconsin members as a liaison to the AIA and as an information center.

The WSA is composed of four chapters, each having its own Executive Committee and accompanying committees and programs pertinent to its part of Wisconsin and its communities. Emphasis of the chapters is on participation and special events tailored to their needs through local meetings and seminars. All members have the opportunity to affect the direction of their profession and produce progress in many areas.

Executive Office Operations

1. **Eric Englund.** Executive Director. Manages Headquarters office. Implements policies of the Board of Directors. Responsible for maintaining operations within budget set by the Board. Coordinates committee activities. Lobbyist. Edits all publications of the Society, including Wisconsin Architect, Hotline and other materials. Coordinates convention activities. Acts as liaison with State Government, and the legislature, all groups in the Construction Industry, the AIA, and the news media.

2. **Karen Linley.** Executive Secretary. Assistant to the Executive Director. Manages all financial records and accounts of WSA. Dues collection. Assists as needed with convention planning and implementation, fall workshop, other special events. Membership secretary. In charge of master information records. Schedules all mailings.

3. **Sandra Swatek.** Secretary to the Executive Director and Girl Friday. In charge of inventorying, purchasing, selling, billing and mailing of all AIA documents and codes. Processes Newsletters, Addenda and all Executive Director's Correspondence. Handles employment service, library and multiple miscellaneous problems.

4. **Nancy Baxter.** Advertising Director for the WISCONSIN ARCHITECT. Coordinates all advertising sales, subscription sales, and other matters pertaining to the income for the WISCONSIN ARCHITECT. Educates WSA members and advertisers regarding the value of advertising in the WISCONSIN ARCHITECT.

Architects usually call the WSA office with questions on ethics, documents, application for license in another state, renewal of license, supplemental dues, questions on insurance, etc. And we're always on the phone helping someone to locate a job in an architectural office, or assisting an architect in finding someone to fill a vacancy.

A great many calls come in from all segments of the construction industry and legal profession inquiring about codes, documents and legislation.

Innumerable calls are received from the general public — prospective clients in need of architectural services seeking guidelines as to how to go about retaining an architect. What do they do? and What do they charge? are the most frequent questions asked by the unsophisticated callers.

While the great majority of calls formerly came from individuals seeking architectural services on a very small scale (a residence, an addition to an existing building), more and more calls are now being received from prospective clients with considerably larger projects in mind, i.e., a library, an educational building, a municipal complex. We use all of these instances as opportunities to educate the public on the true nature and value of architectural services, advising them on the best method of selection, etc.

No matter what the need — call us. We'll do our best to fill it.

Introducing a better solution to building access problems.

Cheney Handi-Lift II Vertical Wheelchair Lift.

The new Handi-Lift II Vertical Wheelchair Lift offers an ideal solution to the problem of providing safe stairway and building access for people with physical problems including those confined to wheelchairs, especially in areas where height is a problem. That's because the new Cheney Handi-Lift II has a lifting height range of 4 to 12 feet... the highest available in the country. And the Cheney Handi-Lift II is more space efficient. It requires less floor area than competitive units, yet still provides a full 12 square foot lift platform. Designed and built by the Cheney Company, the Handi-Lift II is backed by Cheney's years of engineering excellence and adapts to both indoor and outdoor applications in private homes, churches, schools, office buildings and industrial plants. And it's available in a variety of colors, textures and panels to blend attractively with any decor.

For more information on how Cheney can help solve today's access problems, check your Sweets Catalog or contact Darlene Lewis (414) 782-1100.

Benefits of Membership in WSA

1. **Work.** Whether you are an employee or an employer, WSA helps you get work by means of job listing, client referral, "how to" seminars and cassettes, etc.

2. **Marketing Information.** You get no place without this today. WSA organizes seminars, makes available printed material, cassettes, inserts information in the Wisconsin Architect.

3. **Firsthand News** affecting the practice of architecture by means of committee reports, Hotline, Wisconsin Architect, etc.

4. **State Agencies' Contracts** are updated with the help of WSA representation. Some past inequities have been corrected.

5. **AE Selection** by means of bids is an invitation to disaster. You know it. Does your prospective client know it? Get the background and current information on this development.

6. **Insurance Rates.** Maybe your premium or your exposure can be reduced. WSA has committees working on this, information and advice to give you.

7. **An Eye On Legislation** affecting zoning, planning, professional registration, taxes, procurement of services and other matters of interest to the profession and the construction industry.

8. **Legislative Relief.** WSA has an active legislative committee and minuteman program.

9. **An Eye On Building Codes.** Committees have been working at state and national levels to improve regulations affecting buildings.

10. **Continuing Education** programs on all of the timely subjects, like marketing, energy conservation, production efficiency, etc.

11. **Library** of architectural books, tapes, movies, and video cassettes are available on loan at no charge.

12. **Exchange Of Ideas, Exploration** of mutual technical and professional problems at local and state meetings.

13. **Learning By Association** with other architects and distinguished non-architect guests. Every person you talk to at local or state meetings is an expert on something.

14. **You Become Part Of** effort to maintain and improve high ethical and technical standards. For instance, a lot of discussion is taking place now on the new revision of the AIA Standards of Professional Practice (the "Code of Ethics"). Why don't you get in on this?

15. **A Forum** for presentation of viewpoints. You play a part in establishing the standards of the profession by expressing your opinion at local and state meetings.

16. **Participation On Committees.** You can be on a local, state or national committee almost for the asking. This could be very broadening and very instructive.

17. **Common Front** presented on issues important to the profession. Witness WSA activity against competitive bidding.

18. **Contract Forms** and other documents. These are sold by WSA to members — with same-day service. WSA members pay a discounted price for documents.

19. **Hotline** and other communications which keep members up to date on numerous important matters. For instance, a synopsis of senate and assembly bills which are of interest to us are included after a review by a committee and attorney.

20. **The Wisconsin Society of Architects, Construction Industry Handbook**, issued yearly, is a reference for valuable information not found elsewhere. Look through the latest issue and discover its great value.

21. **Public Relations** program in Wisconsin newspapers and our own magazine, The WISCONSIN ARCHITECT, distributed to important people outside the profession. This educates the public, upholds the image of the architect.

22. **Status And Prestige** enhanced by membership in local chapter, WSA and AIA. This translates into personal satisfaction and better respect by the community.

23. **Information Service** on such professional matters as state laws (proposed and enacted), document forms, state administrative structure, licensing, sources for other needed information.

24. **Job Bank**, for employees searching for employers and vice versa.

25. **Honor Awards** program at both the State and Chapter levels which provide peer recognition, as well as local, state and national publicity to winners.

26. **WATS Line** - A toll free phone number to be used in contacting the WSA office.

27. **DILHR Plan Delivery** - The WSA staff will hand carry your plans to DILHR, pick them up, and return them to you for a nominal fee.

28. **Workmans Compensation Insurance** - WSA members can participate in a group plan which will return a dividend.

29. **Agenda's** of the Division of State Facilities Management are available in order that members can keep track of developing state jobs.

Books, Movies, Slides and Video Cassettes Available To WSA Members

The WSA maintains a lending library of books, movies, slides and video cassettes available for use by WSA members. These materials are available for checkout either in person, or by mail. If you are in Madison, feel free to stop by the WSA office and browse. If you aren't in Madison, simply call the WSA office using the toll free WATS line (1-800-362-3912) to make arrangements to have the materials sent to you.

If there are materials which you feel should be part of the WSA lending library, contact the WSA office.

A detailed list of books, movies, slides, and video cassettes available through the WSA office is available on request to the WSA.

When it comes to windows and gliding doors, Andersen is America's frame of reference.

All across America—this state included—Andersen is the best-known name among window brands.

Because Andersen offers a complete line of windows, roof windows and gliding patio doors. For residential and commercial designs. For new construction, remodeling and replacement.

Windows and gliding doors in hundreds of sizes and glazings. In white or earthy Terratone color. With low-maintenance Perma-Shield® vinyl exteriors. And Andersen's legendary weathertightness.

All across America, when the topic is windows, the subject is Andersen.

Come see us today and let's talk about your window needs.

TEAK and KARPAWOOD
for parquet floors

The warm, natural look of a Teak or Karpawood parquet floor is treasured now more than ever before. These two imports are a delight to those who love the rich-grained beauty of wood.

TEAK is the ultimate in beauty, elegance and prestige . . . yet, it is very hard and will last for *decades*.

KARPAWOOD, known in Thailand as ironwood, is harder than oak, and has an extremely low coefficient of expansion.

Both woods are available from our Chicago warehouse in many UNfinished and PREfinished patterns.

Phone (collect) for free samples, brochures of 80 floor designs, technical information, prices. Or, write:

Thailand Teakwood Importers, Inc.
645 North Michigan Avenue, Chicago, Illinois 60611
(312) 337-3938
(We are Midwest distributors for Bangkok Industries, Inc., Philadelphia)

WHAT'S SO UNIQUE ABOUT THIS SEAL?

It means that the interior plantscaper who is authorized to use this seal is a professional in every sense of the word, and has been certified by the National Council for Interior Horticultural Certification (NCIHC).

The National Council for Interior Horticultural Certification (NCIHC), a non-profit council, was formed to establish and maintain high standards within the interior landscape industry.

The certification process is used to qualify and identify professionals in the industry. This includes successfully passing all sections of a demanding written exam which covers: horticulture, business, maintenance and design. HCIHC also conducts an examination of educational, professional and personal backgrounds as well as a review of business projects and workmanship.

So, the person using this seal can offer you a great deal in the way of expertise, know-how and excellence.

Certified Interior Horticulturist on Staff: # 0062 – MAXINE R. APPLEBY

WISCONSIN ARCHITECTS
FOUNDATION

Serving Education
for
Wisconsin Architecture

615 East Washington Ave.
Madison, Wisconsin 53703

BUILDING A BETTER WISCONSIN THROUGH ARCHITECTURAL EDUCATION

The Wisconsin Architects Foundation (WAF) was created in 1954 for the purpose of supporting Architectural Education in Wisconsin, principally through scholarships and grants. To date, almost $85,000 has been distributed to 150 students.

In recent years, the WAF contributions to Scholarships have been exclusively to UW - Milwaukee students. With greater financial resources, the WAF would be able to support Wisconsin students at other institutions as well as offering grants and prizes for programs that relate to the improvement of the practice and profession of Architecture in Wisconsin.

The advertisement pictured on this page will be appearing monthly in the Wisconsin Architect. The members of the WAF encourage your contributions, either by way of annual membership or donation to the endowment fund. Tax deductible contributions and membership are an act of participation in support of the strength and vitality of the Architectural Profession in Wisconsin.

Within the next several months the WAF will contact all Wisconsin Architects, along with numerous other individuals and corporations who support and appreciate architecture. You can help by undertaking your annual membership and endowment donation to the WAF. You can additionally help by impressing upon those in related professions and industry of the vitality and benefits of the WAF.

For further information, contact current members of the WAF or our Executive Director, Eric Englund.

The Wisconsin Architect
A Look at 1984

Magazine Themes for the Coming Year

Wisconsin Architect

1984 will be an exciting year for the *Wisconsin Architect.*

The Editorial Board has selected magazine themes for the coming year (listed below), and once again invites you to enhance the quality and scope of the magazine by submitting your projects and articles. This is an opportunity to share your work and ideas with other professionals in the field, In addition, your published article can be purchased in quantity, separately from the magazine, to use as a marketing tool. Additional copies of the *Wisconsin Architect* are also available.

To have your article considered for publication in the *Wisconsin Architect,* mail copy, and photos or drawings if available to: Editor, The *Wisconsin Architect,* 615 East Washington Avenue, Madison, WI 53703. Photos are encouraged, provided they are black and white glossy, and clear. Photos should be accompanied by a brief description of the project, and the design goals. The deadline for receipt of articles is two months prior to the month of publication, i.e., February 1 for April issue, etc.

APRIL

INTERIOR DESIGN AND LANDSCAPE ARCHITECTURE

Stories, articles and pictures pertaining to interior design, space planning, and landscape architecture.

Citations For Distinguished Service To Architecture

In 1980 the WSA Board of Directors endorsed the awarding of Citations for Distinguished Service in conjunction with the Annual Honor Awards Program. These citations are issued to individuals or groups in recognition of their contributions to architecture, architecture awareness, and related subjects. Any WSA member may recommend an individual or group for receipt of this Citation. Such a recommendation will be presented to the Board of Directors for consideration and action.

If you would like to nominate an individual, company or organization to receive a Citation for Distinguished Service, please contact any member of the Board of Directors; Doug Kozel, AIA, 1984 Honor Awards Program Chairman; or the WSA Office.

VANDE HEY RALEIGH
ARCHITECTURAL ROOF TILE

PERMANENT Vande Hey-Raleigh Architectural Roof Tile is a 50 year warranted roof. Completely weatherproof . . . withstands tropic summers, frigid winters, with equal ease. Termite-proof, rodent-proof, rot-proof concrete roof tile will offer protection from the elements for as long as the structure stands. Reroofing costs are eliminated.

BEAUTY Vande Hey-Raleigh Roof Tile offers a practical beauty never before possible. From the soft, flattering lines of the Rough Shake design to the more traditional styles, Vande Hey-Raleigh's distinctive designs add a roof of beauty and color that harmonizes with any style architecture.

PRECISION MADE Vande Hey-Raleigh Roof Tile is manufactured with all modern high production equipment . . . solving the problem of high cost and extreme weight with a completely new formulated mix impregnated with plasticizers giving the product a soft finish . . . each tile trimmed to size.

Vande Hey-Raleigh Architectural Roof Tile is a beautiful, maintenance free, non-combustible roof system.

It cost less than fire treated cedar shakes, clay or slate.

Call collect for your nearest sales representative. Our sales people are active throughout the state and will be happy to meet with you.
